

INTERNSHIP REPORT PRESENTATION

C++ Programming

Virtual Internship

Internship Certificate: 03 August 2026 – 02 September 2026

</>

**Aditya
Pandey**

B.Tech CSE • IILM University

Certificate ID: THX-AUG0326-247

Candidate Profile

Academic and internship details

**Aditya
Pandey**

	Name	Aditya Pandey
	Institute	IILM University, Greater Noida, U.P.
	Programme	B.Tech CSE • Batch 2024–2028
	Internship Domain	C++ Programming
	Duration	03 August 2026 – 02 September 2026
	Certificate ID	THX-AUG0326-247

C++ Programming Internship

Practical programming and application development

The internship focused on strengthening practical programming skills using C++. The learning journey emphasized programming fundamentals, problem-solving, and hands-on application development.

01

Programming Foundations

Variables, data types, operators, conditions, loops, arrays,

02

Object-Oriented Programming

Classes, objects, encapsulation, constructors, member functions,

03

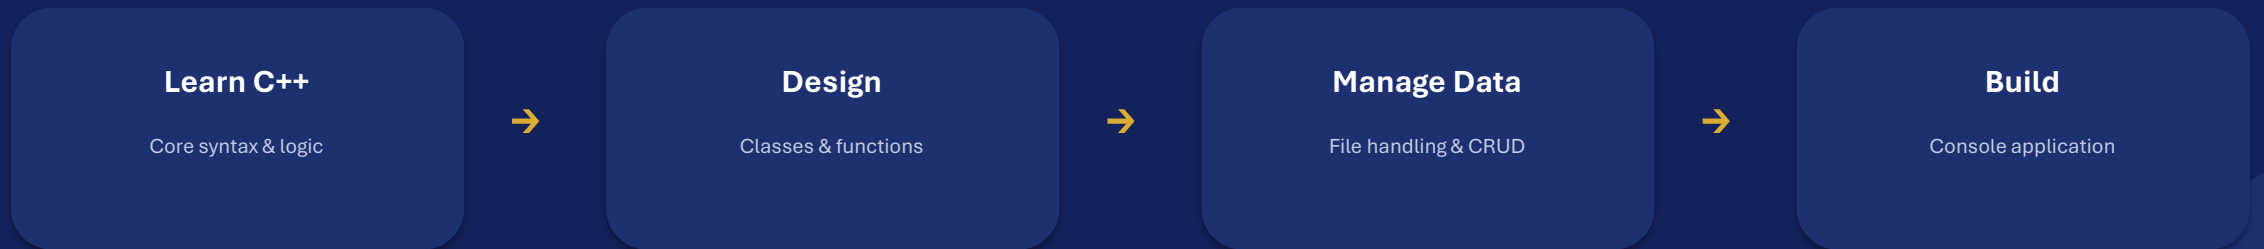

Practical Application

File handling, CRUD operations, input validation and menu-driven programs.

From Programming Concepts to a Working Application

Applying C++ fundamentals in a structured, practical project

Programming concepts are most valuable when they can be applied to solve a real task. The internship work focused on moving from individual C++ concepts to a c

What the Internship Work Set Out to Achieve

Building practical confidence with C++ development

01

C++ Fundamentals

Strengthen syntax, control flow, arrays, strings and functions

02

OOP

Apply classes, objects and encapsulation in application development

03

File Handling

Store and retrieve records using persistent file-based storage.

04

CRUD Operations

Implement add, display, search, update and delete functions

05

Validation

Handle user input carefully and improve application reliability

06

Project Development

Combine concepts into a complete menu-driven console application

The Toolkit Behind the Internship

Languages, development environment and core programming concepts

C++

C++

Primary programming language

OOP

OOP

Classes, objects and encapsulation

FILE

File Handling

Persistent record storage

STL

STL / Strings

Common data and text operations

VS

VS Code

Development environment

++

G++

Compiler for building C++ programs

.*

Regex

Input validation where required

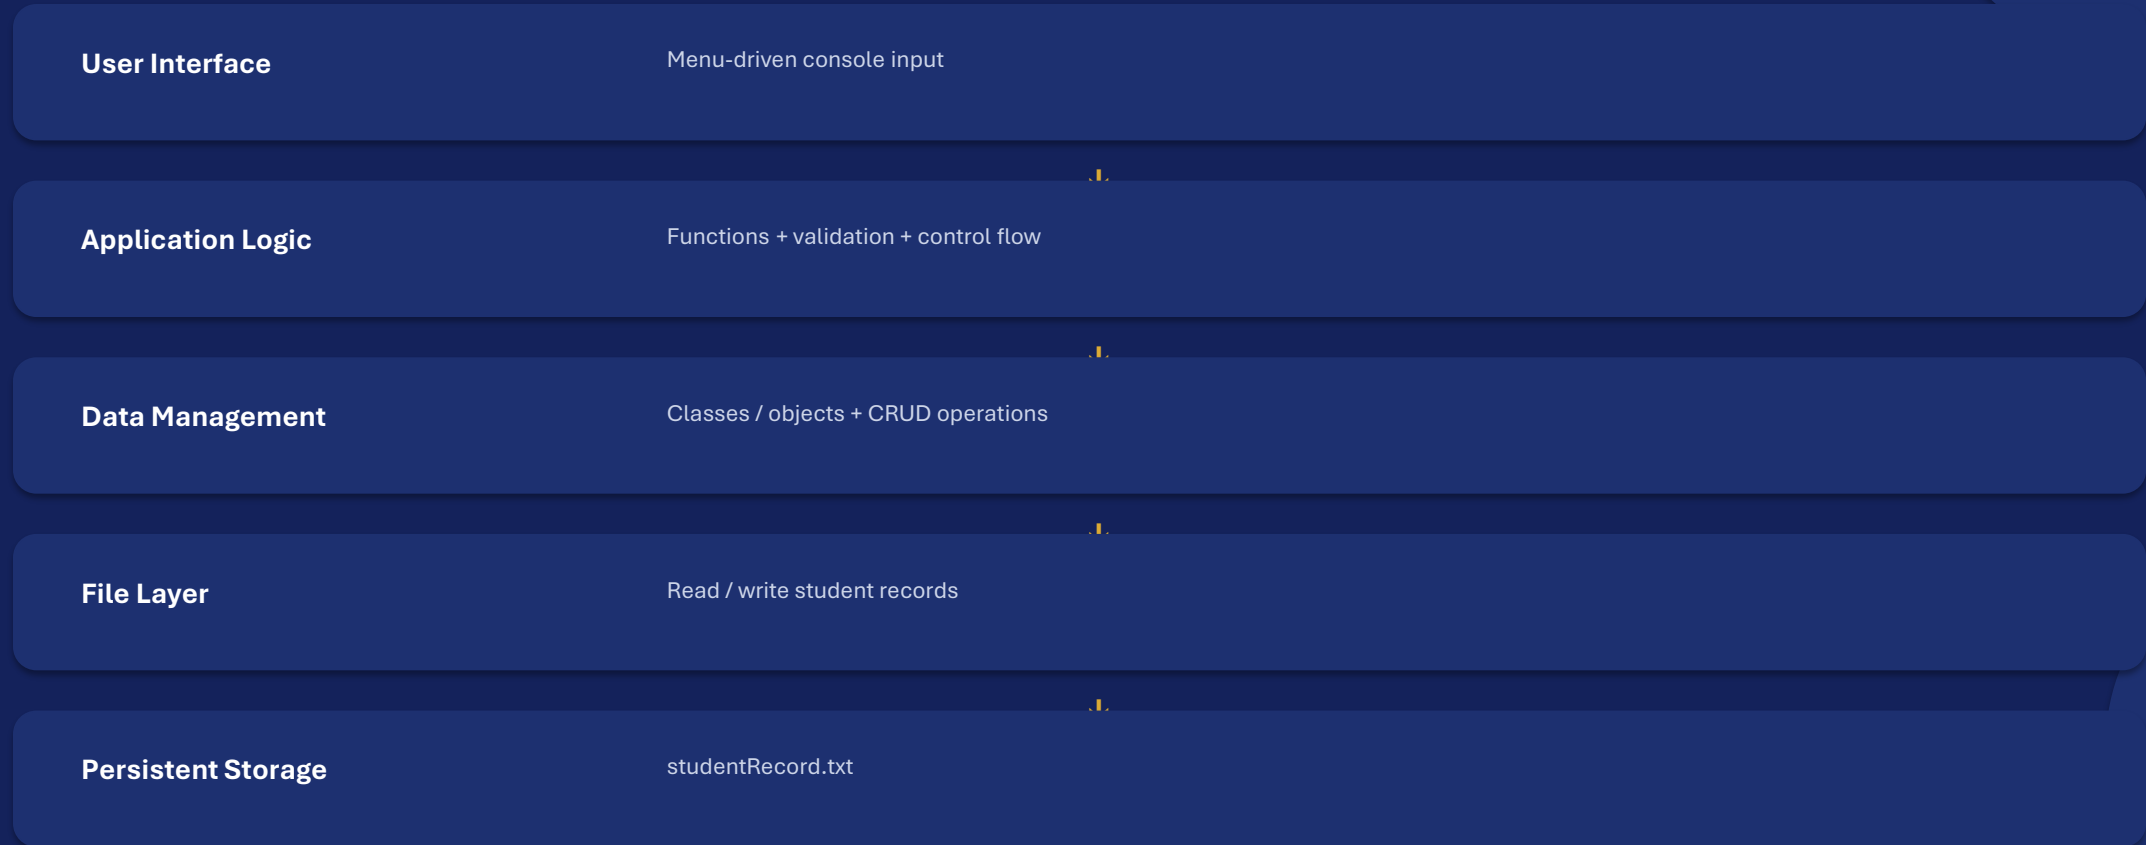

>_

Console Apps

Menu-driven application interface

From User Input to Persistent Student Records

High-level flow of the console-based Student Management System

The Learning & Development Journey

A structured progression from fundamentals to application

1

C++ Foundations

Syntax, variables, operators and control flow

2

Functions & Arrays

Modular programming, arrays and strings

3

OOP

Classes, objects, constructors and encapsulation

4

File Handling

Reading, writing and persistent storage

5

CRUD Design

Add, search, update and delete operations

6

Validation

Input handling and error management

7

Integration

Combine modules into one application

8

Testing & Documentation

Debugging, refinement and project presentation

Skills & Capabilities Gained

Practical outcomes from the C++ internship

- Ability to write structured C++ programs using core language features.
- Practical understanding of Object-Oriented Programming and modular design.
- Hands-on experience with file handling and persistent record storage.
- Capability to implement CRUD operations in a menu-driven application.
- Improved approach to input validation, debugging and error handling.
- Experience combining multiple programming concepts into one working project.

Outcome: stronger C++ fundamentals + practical console application development

CERTIFICATION

Successfully Completed

C++ Programming Internship

✓	Domain	C++ Programming
✓	Start Date	03 August 2026
✓	End Date	02 September 2026
✓	Certificate ID	THX-AUG0326-247

Certificate issued to

Aditya Pandey

C++

Thank You
